

Tracking Climate Change Finance:

Policy Markers in OECD's Creditor Reporting System and their possible adaptation to domestic budgets in non-OECD countries

Tamara Levine

OECD, Environment and
Development Network

GCCA Workshop: Mainstreaming Climate
Change into National Development Planning
and Budgeting

Maseru, Lesotho 25-28 October 2011

Climate markers are statistical codes employed by OECD-DAC to measure the aid targeting at climate change mitigation and adaptation.

Climate Change Mitigation Marker

The activity contributes to

- a) the mitigation of climate change by limiting anthropogenic emissions of GHGs, including gases regulated by the Montreal Protocol; **or**
- b) the protection and/or enhancement of GHG sinks and reservoirs; or
- c) the integration of climate change concerns with the recipient countries' development objectives through institution building, capacity development, strengthening the regulatory and policy framework, or research; **or**
- d) developing countries' efforts to meet their obligations under the Convention.

Climate Change Adaptation Marker

- a) the climate change adaptation objective is explicitly indicated in the activity documentation; **and**
- b) the activity contains specific measures targeting the definition below.

Definition of adaptation: It intends to reduce the vulnerability of human or natural systems to the impacts of climate change and climate-related risks, by maintaining or increasing adaptive capacity and resilience. This encompasses a range of activities from information and knowledge generation, to capacity development, planning and the implementation of climate change adaptation actions.

Logical Steps for marking

Q1. What objectives are stated in the project/programme document?

Q2. Do any of the stated objectives match “Criteria for eligibility” of Rio Markers?

Yes

No

Q3. Would the activity have been undertaken without this objective?

No

Yes

2

Principal

1

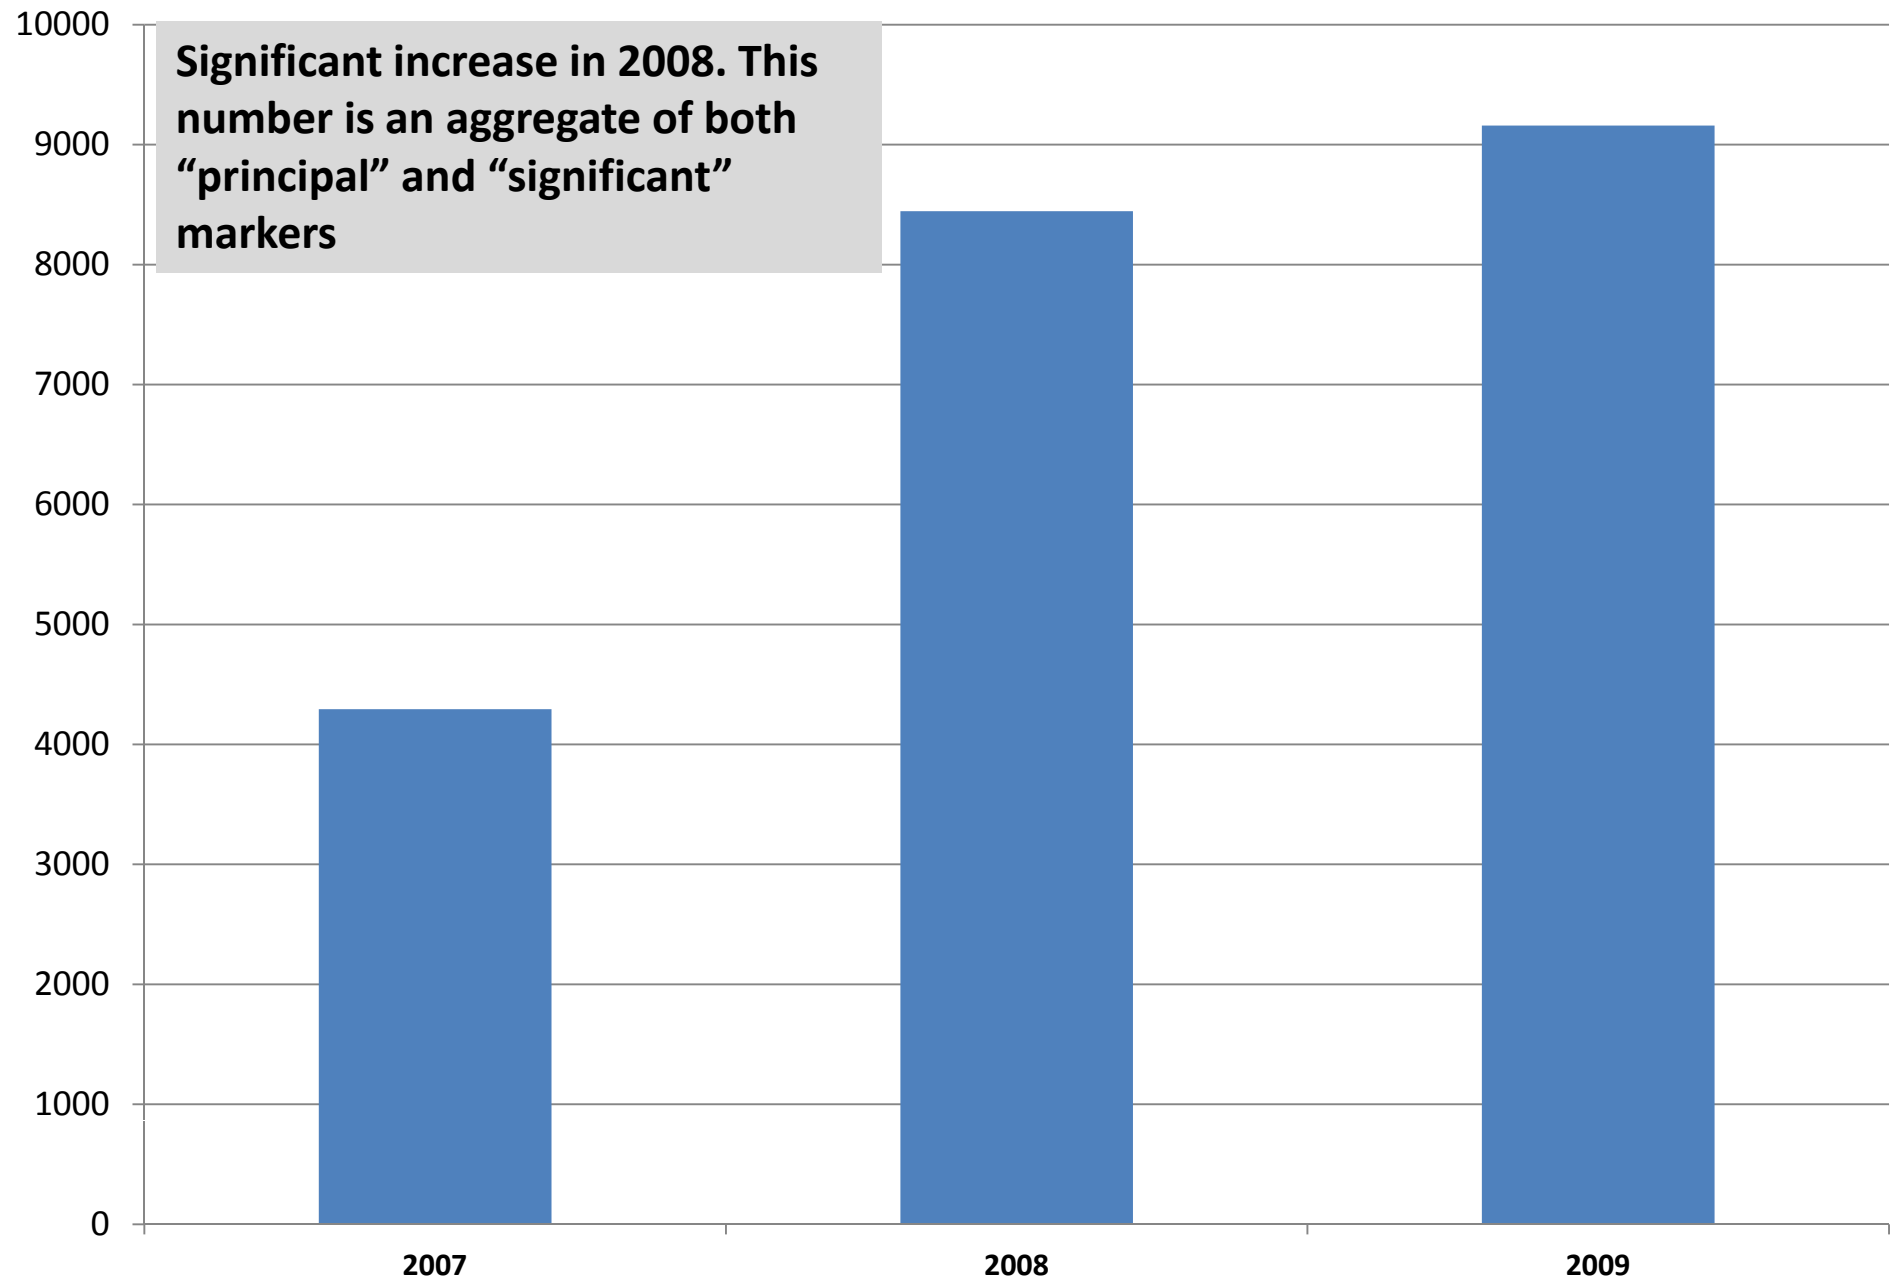

Significant

0

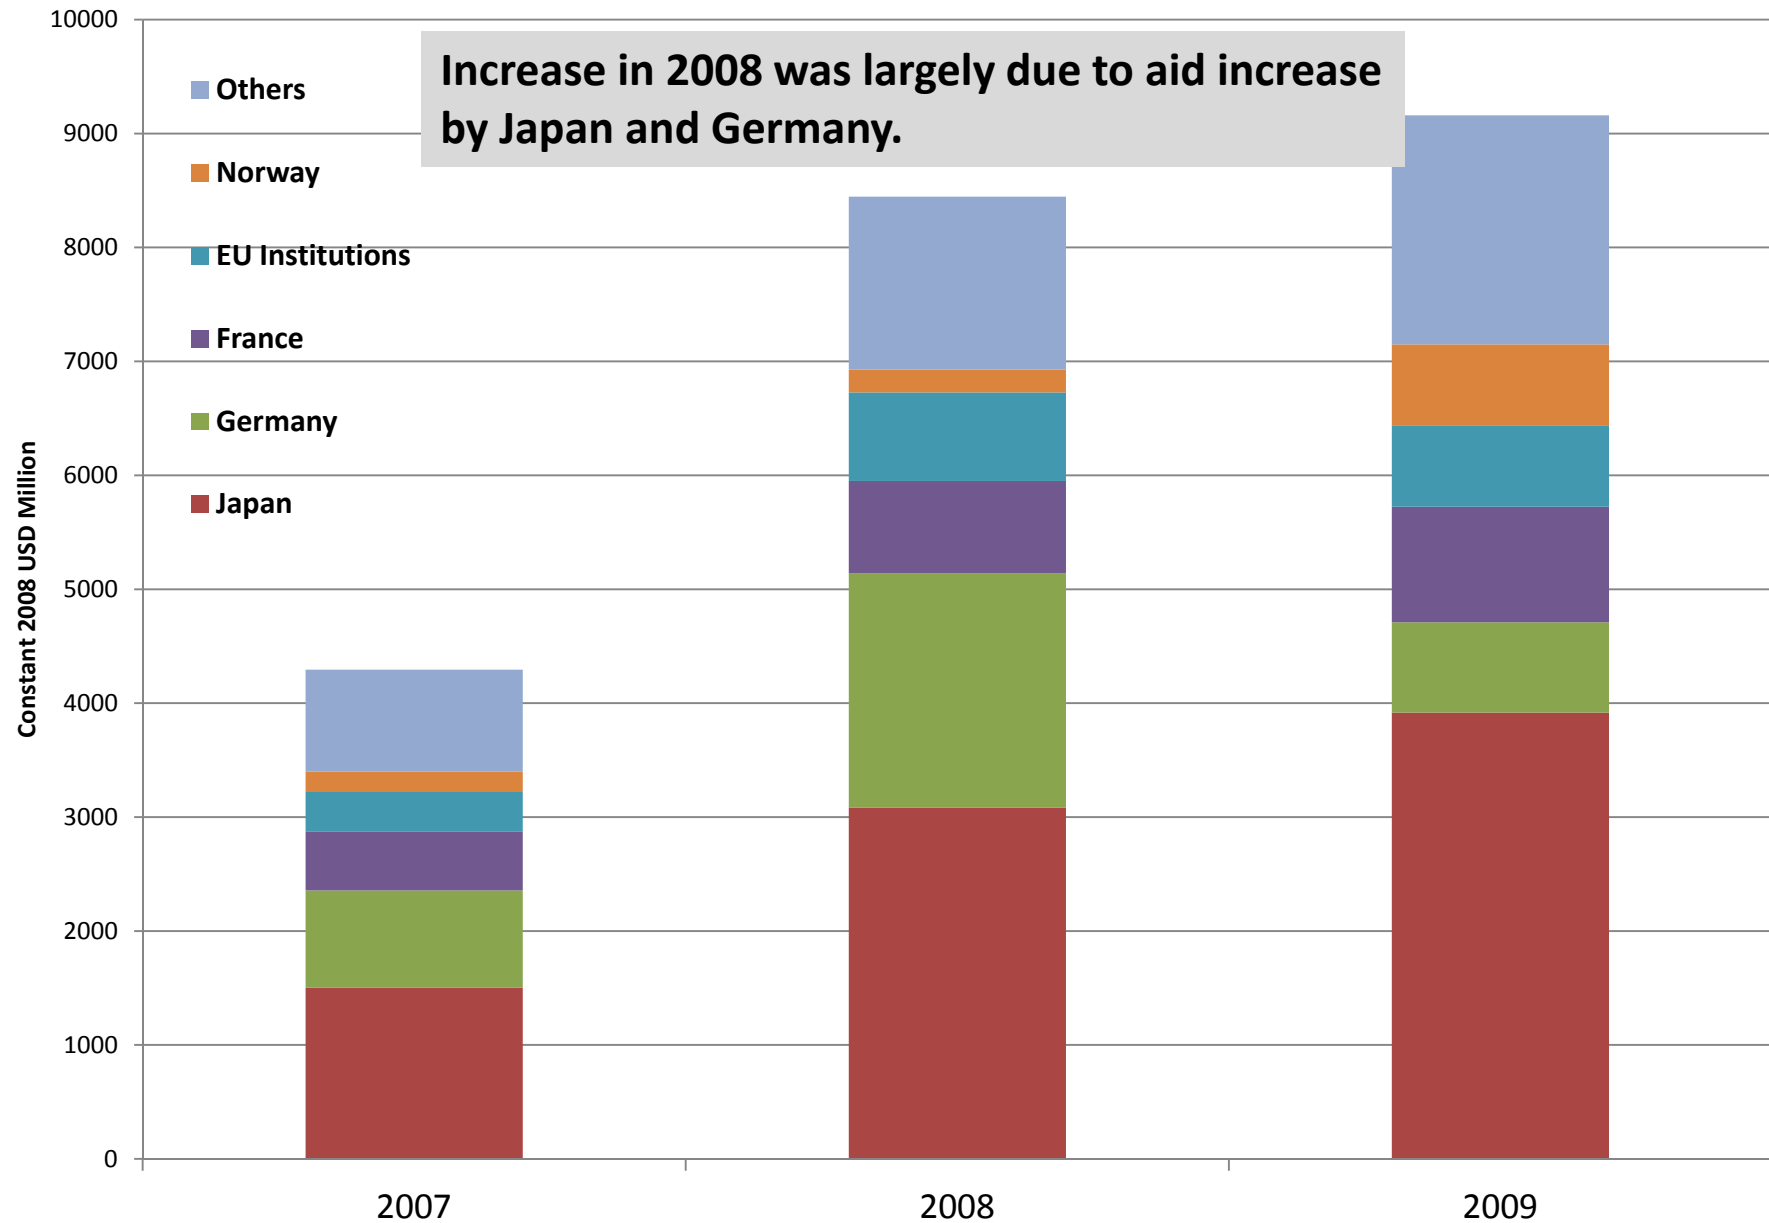

Not targeted

Recipient	Project title	USD amount, '000	sector	Biodiversity	Climate Change	Desertification
Morocco	Thinghir and Zagora cities sanitation	20 914	Water Supply and Sanitation	1	1	1
Laos	Preserving agrobiodiversity	4 208	General Environmental Protection	2	0	0
Niger	Food security and organisation of villages in North Niger	1 401	Agriculture	0	0	1

Aid for climate change : Global Trend

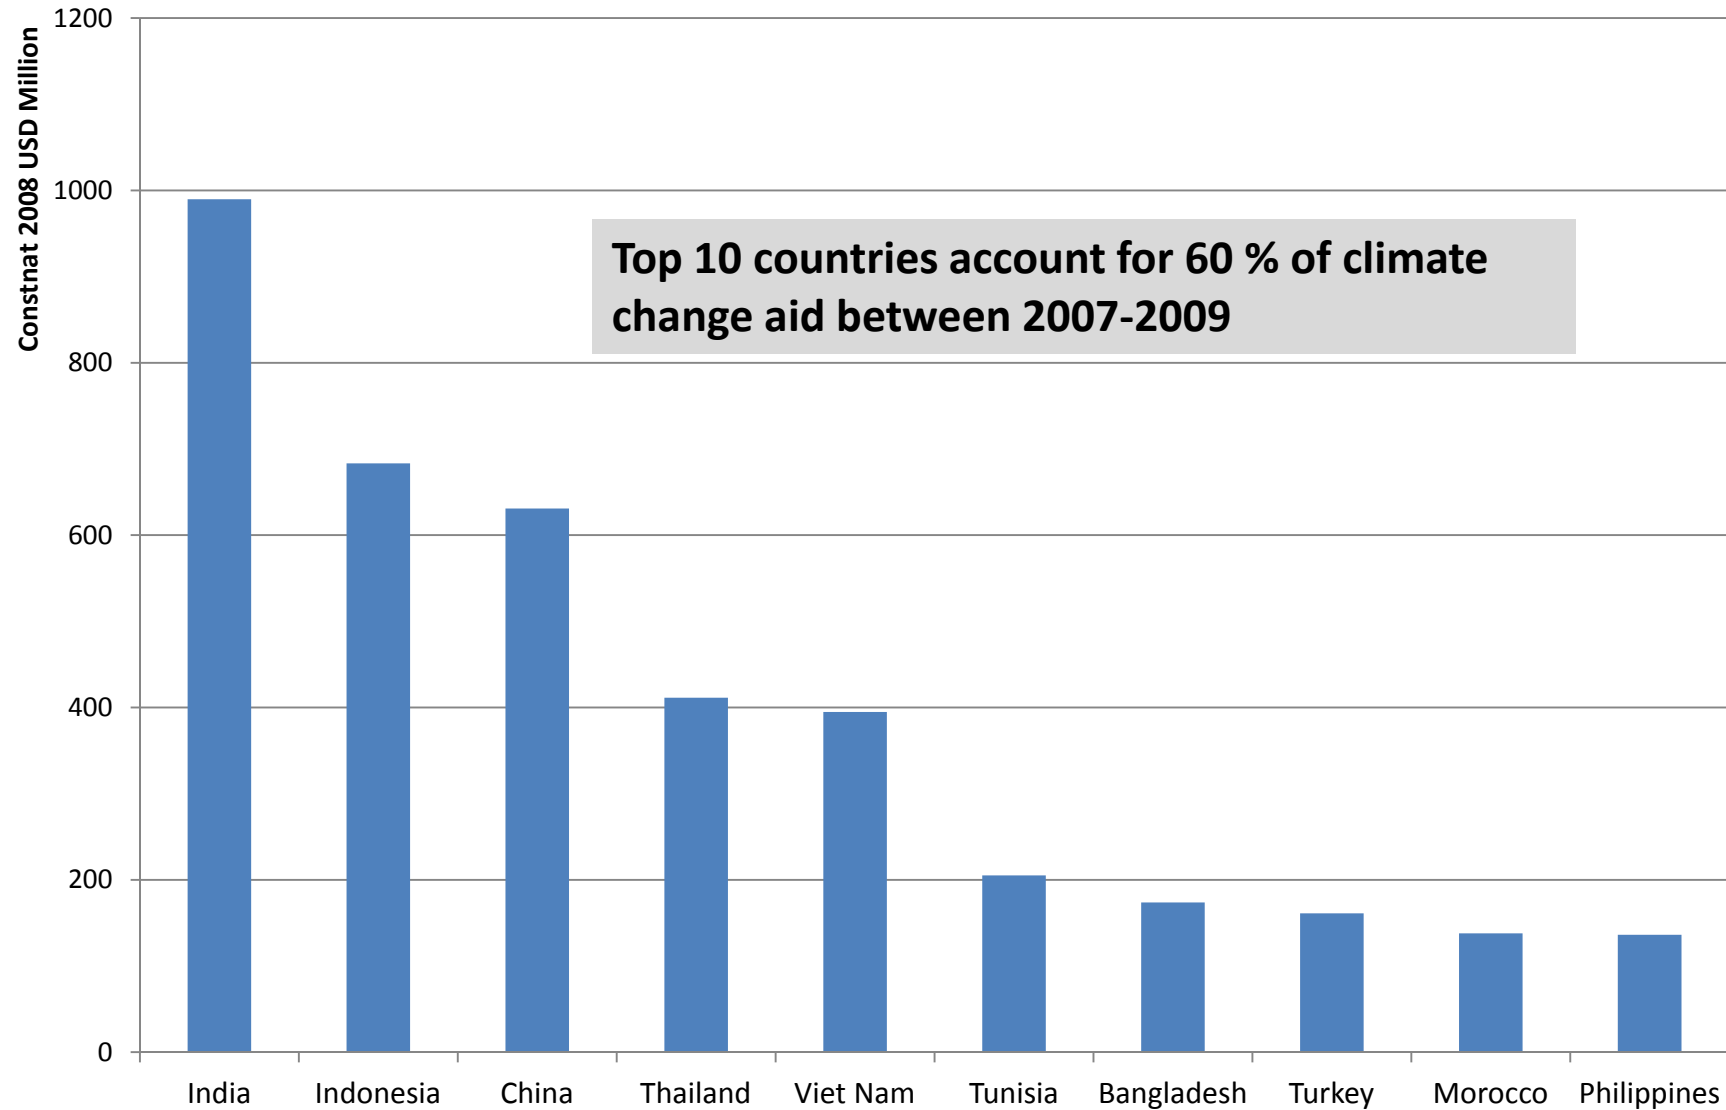

Aid for Climate Change Mitigation: Who is giving?

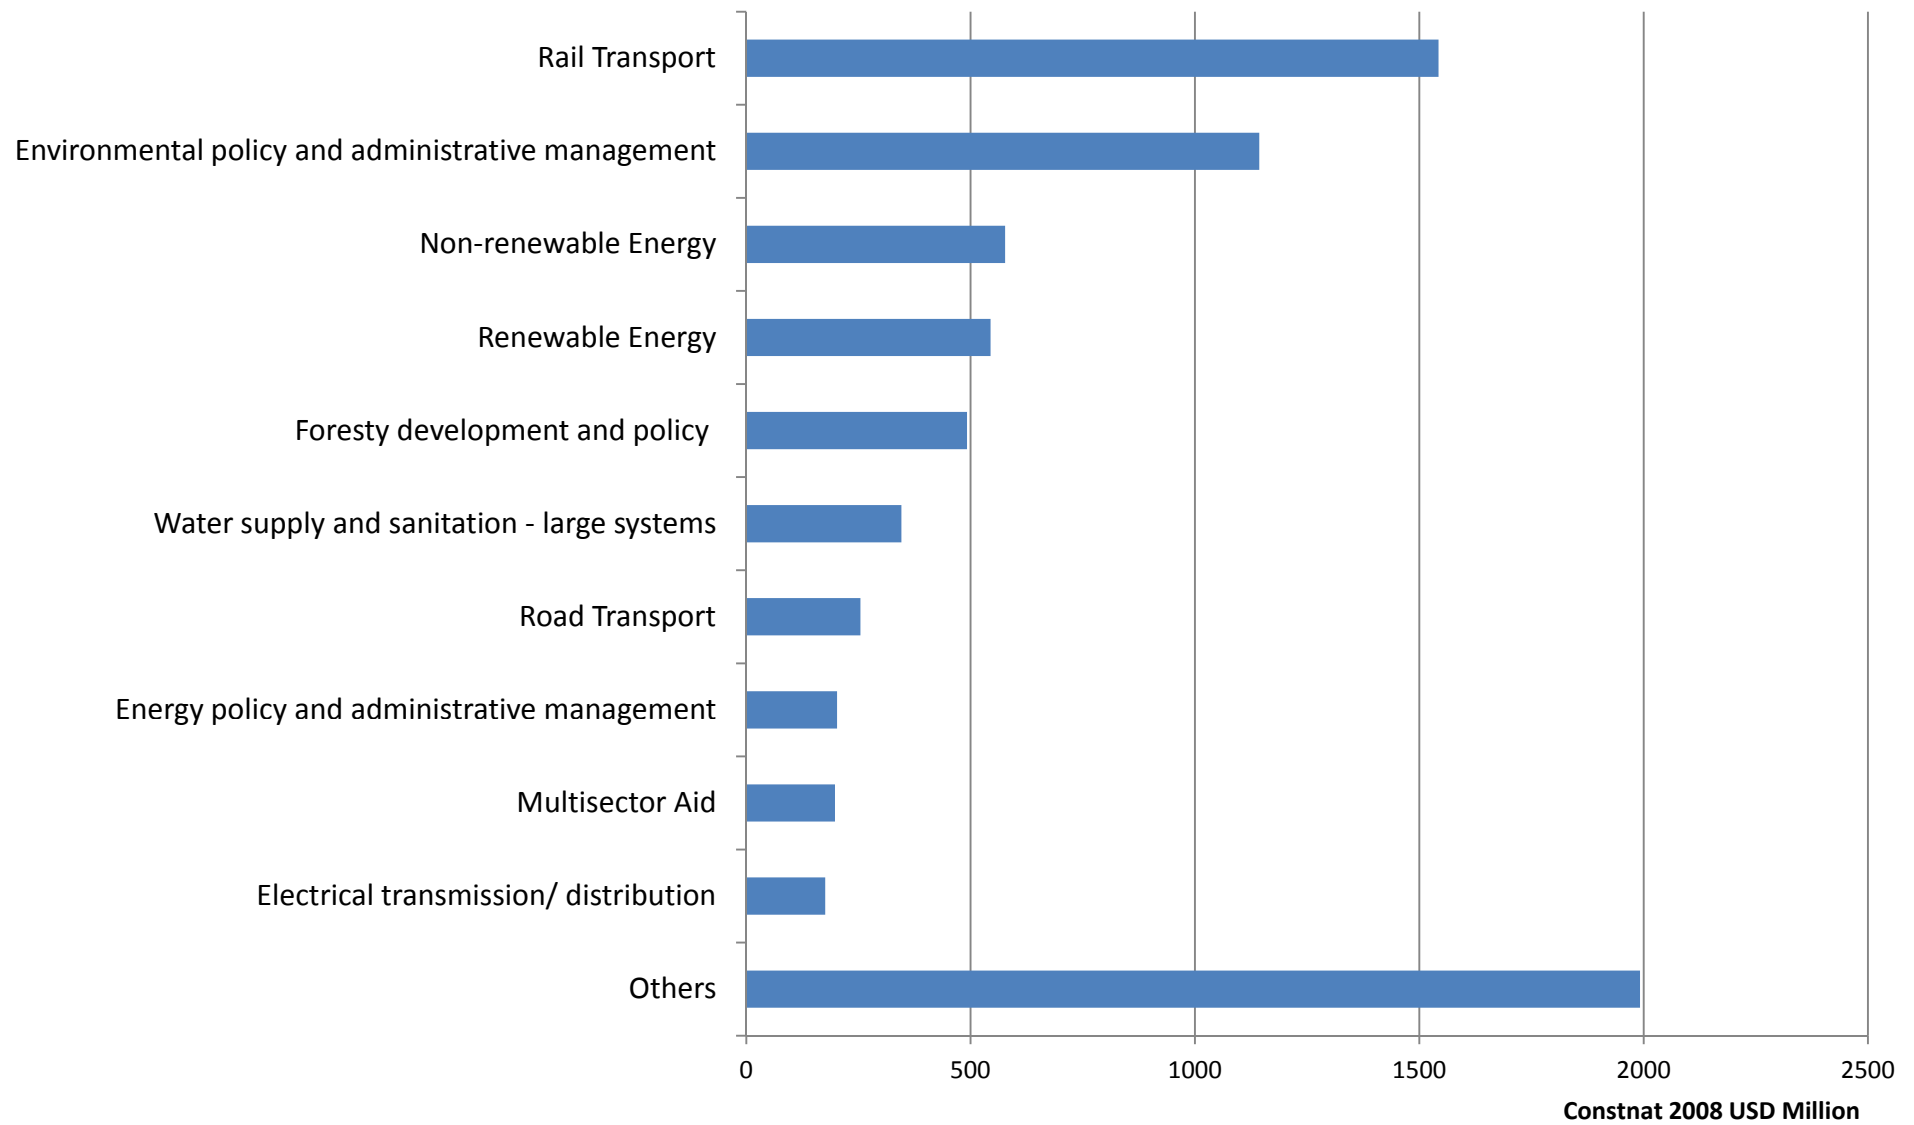

Note that approximately half of Japanese Aid for Climate Change is provided through loans, not grants.

Aid for climate change mitigation: Who is receiving? (Average, 2007-2009)

Aid for Climate Change: Top 10 Activities (Average, 2007-2009)

Thank you!
