Context

Strong UK leadership

Committed to:

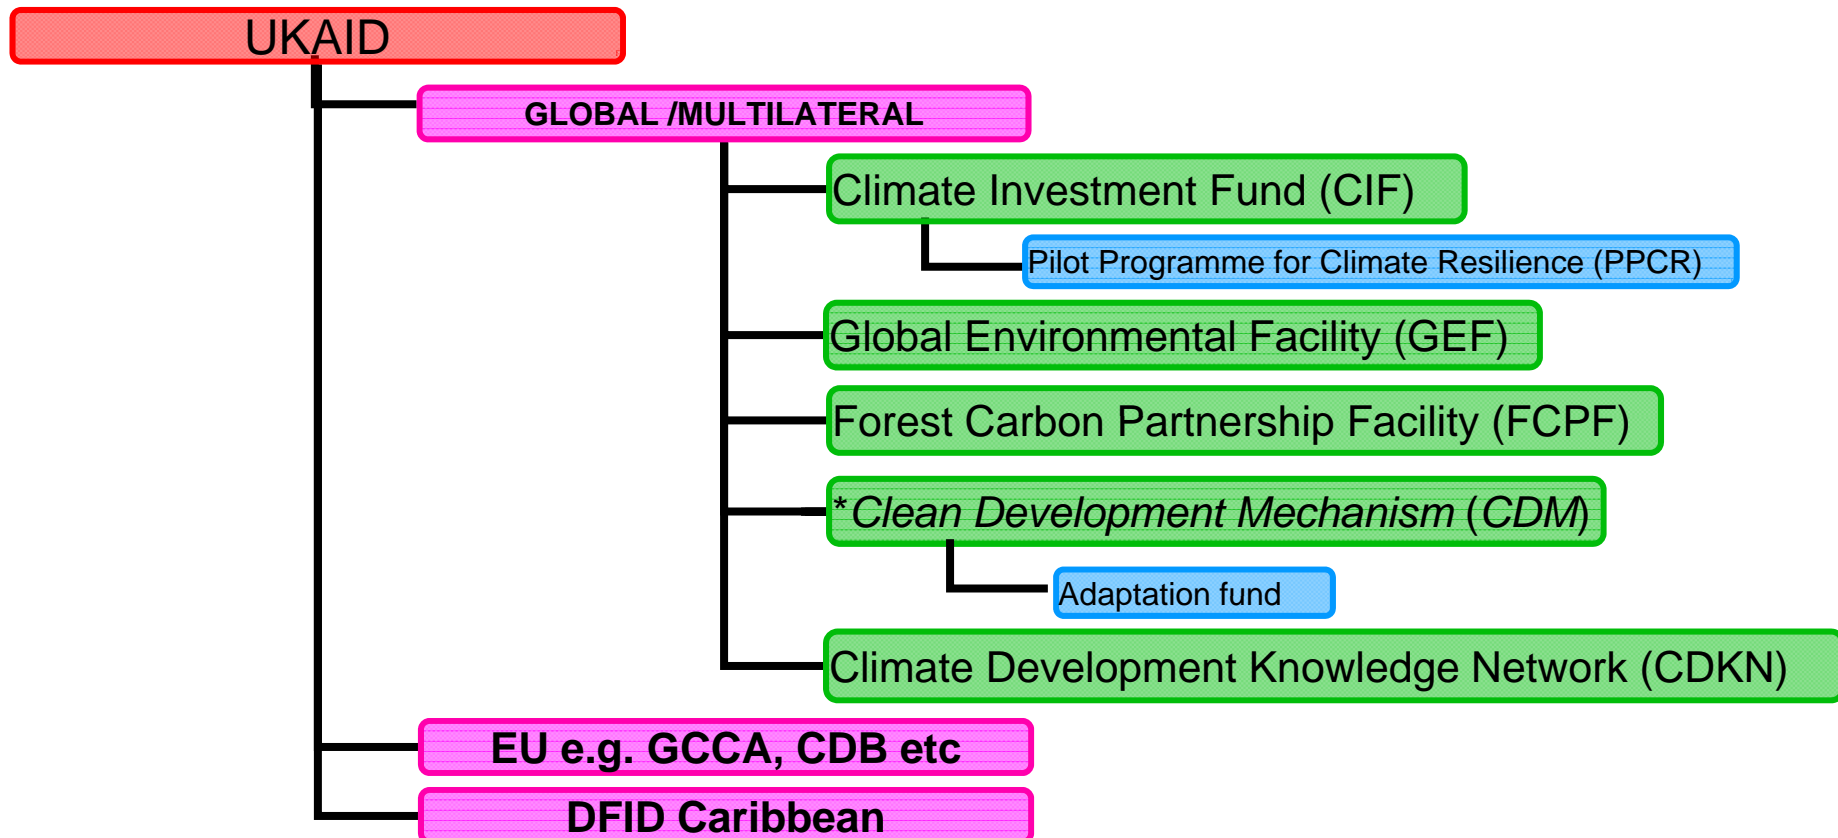

- **Cut emissions** by 80 per cent by 2050
- Spend **0.7% of national income as ODA** from 2013
 - which has enabled an unprecedented **£2.9 billion International Climate Fund** that will not only meet our Fast Start pledge but will enable us to ramp up our funding up to 2015.
- **Aid budget is climate smart-**
 - New Environment and Climate assessment
 - Strategic Review in 6 pilot countries (incl Caribbean) to ensure climate issues addressed in DFID business plans
 - Roll out to all programmes this year
- Strong emphasis **on results, evidence and value for money**

Size and position for image

Funding for climate resilience development

- Through bilateral and multilateral channels

DFID Caribbean Climate Change programme 2011-2015

Caribbean states and people are more resilient to climatic impacts and disasters

1. Effective Climate Change and DRR institutions able to represent the needs of the Caribbean in global negotiations, secure resources from global funds and support national adaptation
2. Evidence base is in place for decision making and planning
3. Better national and sector strategies
4. **Money is where the risk is** - Vulnerable communities are implementing risk reduction (Community resilient fund and new hazard and climate change micro insurance products)

Increase the number of people better able to cope with the effects of climate change
Reduce annual GDP losses due to extreme climate events/natural disasters

DFID's Caribbean regional programme

Resources

At least £22.5m until 2015 on climate change and disaster (total £75m)

Delivery

Build on partnerships with CCCCC and CDEMA and support to member countries as well as sectoral and community-based interventions

Key results

- Building the resilience of **160 vulnerable communities**,
- Developing affordable **hazard insurance** to protect the incomes of **18,000 of the poorest** and **50,000 small farm workers** when disasters do strike,
- **Mobilising institutions** to deliver effective national risk reduction and adaptation in 18 states,
- Supporting local **business led renewable and low carbon energy investments and solutions.**
