

Cambodia Climate Change Alliance Phase Iii

Eventually, you will categorically discover a additional experience and skill by spending more cash. still when? get you agree to that you require to acquire those every needs similar to having significantly cash? Why dont you try to acquire something basic in the beginning? Thats something that will guide you to comprehend even more in relation to the globe, experience, some places, gone history, amusement, and a lot more?

It is your no question own get older to play in reviewing habit. accompanied by guides you could enjoy now is **Cambodia Climate Change Alliance Phase Iii** below.

Cambodia: Energy Sector Assessment, Strategy, and Road Map - Asian Development Bank 2018-12-01

This publication focuses on the strategic investment priorities of the Asian Development Bank (ADB) in the energy sector of Cambodia. It highlights sector performance, priority development constraints, government plans and strategies, and ADB's past and future support. The sector assessment, strategy, and road map is aligned with ADB's Strategy 2030 and will inform its country partnership strategy for Cambodia, 2019–2023, which is currently under development. It seeks to help provide sector background information for investment and technical assistance operations.

Handbook of International Climate Finance - Michaelowa, Axel 2022-10-14

The concept of international climate finance channelled from developed to developing countries through public interventions for mitigation and adaptation has been developed over the last decade, but its roots date back to the early 1990s. Despite the high relevance of the topic in the international climate negotiations, illustrated by the (missed) target to mobilise USD 100 billion by 2020, there is no book that provides an overview accessible to academics and practitioners alike.

Land Grabbing and Migration in a Changing Climate - Sara Vigil 2022-02-28

This book provides a theoretical and empirical examination of the links between environmental change, land grabbing, and migration, drawing on research conducted in Senegal and Cambodia. While the impacts of environmental change on migration and of environmental discourses on land grabs have received increased attention, the role of both environmental and migration narratives in shaping migration by modifying access to natural resources has remained under-explored. Using a variegated geopolitical ecology framework and a comparative global ethnographic approach, this book analyses the power of mainstream adaptation and security frameworks and how they impact the lives of marginalised and vulnerable communities in Senegal and Cambodia. Findings across the cases show how environmental and migration narratives, linked to adaptation and security discourses, have been deployed advertently or inadvertently to justify land capture, leading to interventions that often increase, rather than alleviate, the very pressures that they intend to address. The interrelations between these issues are inherent to the tensions that exist, in different contexts and at different times, between capital accumulation and political legitimation. The findings of the book point to the urgency for researchers and policymakers to address the structural causes, and not the symptoms, of both environmental destruction and forced migration. It shows how acting upon environmental change, land grabs, and migration

in isolated or binary manners can increase, rather than alleviate, pressures on those most socio-environmentally vulnerable. This book will be of interest to students, scholars, and practitioners working on the topics of land and resource grabbing and environmental change and migration. The book will also be of interest to those analysing political ecology transitions in Africa and Asia, as well as to those interested in novel theoretical and methodological frameworks.

Cambodia Agriculture, Natural Resources, and Rural Development Sector Assessment, Strategy, and Road Map

- Asian Development Bank 2021-07-01

This publication presents an assessment of Cambodia's agriculture, natural resources, and rural development (ANRRD) sector and provides a strategy and road map for its future development. It identifies the strategic investment priorities of the Government of Cambodia where the Asian Development Bank (ADB) can contribute to ANRRD productivity, value addition, and resource efficiency. ADB support will focus on three key areas: (i) enhancing agricultural productivity through a whole-of-system water resources management approach, (ii) strengthening agricultural value chains, and (iii) improving natural resources management and disaster resilience.

Report on the 24th Meeting of the Least Developed Countries Expert Group - United Nations Framework Convention on Climate Change (Organization) 2013

Climate Change and Gender in Rich Countries - Marjorie Griffin Cohen 2017-06-26

Climate change is at the forefront of ideas about public policy, the economy and labour issues. However, the gendered dimensions of climate change and the public policy issues associated with it in wealthy nations are much less understood. *Climate Change and Gender in Rich Countries* covers a wide range of issues dealing with work and working life. The book demonstrates the gendered distinctions in both experiences of climate change and the ways that public policy deals with it. The book draws on case studies from the UK, Sweden, Australia, Canada, Spain and the US to address key issues such as: how gendered distinctions affect the most vulnerable; paid and unpaid work; and activism on climate change. It is argued that including gender as part of the analysis will lead to more equitable and stronger societies as solutions to climate change advance. This volume will be of great relevance to students, scholars, trade unionists and international organisations with an interest in climate change, gender, public policy and environmental studies.

Assessment of outcomes based on the use of PIM-supported foresight modeling work, 2012-2018 - Lowder,

Sarah K. 2020-02-17

This report presents results of a study to assess the use of foresight modeling tools and outputs produced since 2012 and funded through Flagship 1, Cluster 1.1 of the CGIAR Research Program on Policies, Institutions, and Markets (PIM). The goal of this study is to examine how the tools and outputs of foresight modeling supported by PIM through Flagship 1 (hereafter "PIM-supported foresight modeling") have been used by stakeholders. The study aims to identify as many uses of and outcomes from the PIM-supported foresight modeling as possible. It is by no means comprehensive, but it does cover usage by a wide range of stakeholders from across the CGIAR system, other international organizations, academia, and national governments.

Not just hot air - UNESCO 2015-08-24

Cambodia's Ecosystem for Technology Startups - Asian Development Bank 2022-06-01

Technology-based startup enterprises are an increasingly important part of the business landscape in Asia and the Pacific. By applying innovative technologies to create new products and services, they can make a significant contribution to economic development while generating social and environmental benefits. However, to survive and then thrive, tech startups require an enabling ecosystem that includes supportive government policy, and adequate access to capital, skilled personnel, and quality digital infrastructure. This report assesses the current ecosystem for tech startups in Cambodia, focusing on four sectors: climate change and environment, agriculture, education, and health. The report discusses challenges facing tech startups in these sectors and provides recommendations to overcome them.

Climate Change and Health in the Western Pacific Region - Joshua Nealon 2016-07-19

There is serious concern about the impact of the changing climate. The WHO Regional Office for the Western Pacific has taken the initiative in addressing health issues related to climate change but further action is needed to support efforts to confront climate change in Member States and in various sectors. Health must be mainstreamed into efforts to address climate change and action must be coordinated and integrated across national boundaries and in all sectors. This report synthesizes information and approaches on climate change and health pertinent to Member States in the Western Pacific Region. It also examines efforts and initiatives by various experts and stakeholders with an in-depth look at experiences in seven Member States that reflect the diversity of the Region. Finally it offers recommendations for policy-makers.

Material Geographies of Household Sustainability - Andrew Gorman-Murray 2016-05-13

Charting new research directions, this book constructs a series of imperatives for linking culturally informed research around household sustainability with policy and planning. The household, or 'home', is a critical scale for understanding activities that connect individual behaviours and societal attitudes. The focus on the household in this collection provides a window into the sheer diversity of homemaking and maintenance activities that entail resource use. These practices have affective or emotive dimensions as well as habitual aspects. Diversity, innovation and change at the household scale is often missed in policy approaches which assume that simplistic economic motivations drive demand and this can in turn be 'managed' through regulation or market pricing. The research challenge extends beyond describing existing unsustainable economies driving resource intensive behaviour to consider realistic options for transformations in cultural practices, material relationships and, ultimately, the political economies they sit within. Without change in these systems, government initiatives to promote ecological modernisation run the risk of simply green-washing the very economies of consumption that currently drive unsustainable practices. Social and cultural change at the household level is critical to promoting sustainability at a range of wider scales.

Human Security and Climate Change in Southeast Asia - Lorraine M. Elliott 2013

"This book makes an important and timely contribution to debates about the relationship between climate change and security in Southeast Asia. It does so through a human security lens, drawing on local and regional expertise to discuss the threats that climate change poses to human security in Southeast Asia and to show how a human security approach draws attention to the importance of adaptation and strategies for social resilience. In doing so, it exposes the consequences of climate change, the impact on community rights and access, the special problem of border areas, before going on to investigate local and regional strategies for addressing the human security challenges of climate change"--Provided by publisher.

OECD Investment Policy Reviews: Cambodia 2018 - OECD 2018-12-03

This first OECD Investment Policy Review of Cambodia uses the OECD Policy Framework for Investment to present an assessment of the investment climate in Cambodia and to discuss the challenges and opportunities faced by the Royal Government of Cambodia in its reform efforts. It includes chapters ...

Building Climate-Resilient Fisheries and Aquaculture in the Asia-Pacific Region - Food and Agriculture Organization of the United Nations 2019-10-14

Fisheries and aquaculture is a sector of special importance to food security, nutrition and livelihood in the Asia-Pacific Region, which can be significantly impacted by climate changes and related disaster risks. Effectively addressing climate change impacts and managing disaster risks in fisheries and aquaculture sector are vitally important to building resilience of the sector for sustained and greater contribution to Sustainable Development Goals (SDGs) related to ending hunger, poverty eradication and sustainable use of natural resources. FAO member countries in the region have been making good effort and significant progress in addressing climate change impacts and related disaster risks with support of international communities. A FAO regional consultative workshop was convened to bring together a wide range of players including country governments, regional organizations and other partners to share their knowledge and good practices in addressing climate change implications for fisheries and aquaculture in the region, to assess the progress made in addressing issues with marine capture fisheries, inland capture fisheries, coastal aquaculture and inland aquaculture in the context of climate change adaptation and mitigation in implementing the national plan of actions for addressing climate change in fisheries and aquaculture, and to recommend strategies for addressing institutional and capacity gaps in building climate-resilience fisheries and aquaculture industry in the region. The publication is the compilation of the workshop executive report, background technical papers, extended summary of presentations by representatives from participating government and FAO partners, and the workshop conclusions and recommendations.

International Environmental Law in the Asia Pacific - Ben Boer 1998-02-18

The purpose of this book is to assess the development of international environmental law in the Asia Pacific. Consideration is given to the impact upon the region of global, regional and subregional environmental law. An assessment is also undertaken of how certain states, and groups of states, have responded domestically and within their own subregions to these developments. For the purposes of this book the Asia Pacific is defined as essentially the states which comprise East and Southeast Asia, Australia, New Zealand and the island states of the Southwest Pacific. Occasional consideration is also given to the states of South Asia.

Going Nowhere Fast - Sabina Lawreniuk 2020-07-10

Using data and insights from over ten years of field research in Cambodia this book explores how inequality persists in a hypermobile world.

Climate Change in Asia and the Pacific - Venkatachalam Anbumozhi 2012-06-13

Climate change is one of the most significant challenges to global economic development. Left unchecked, continued global warming could cause worldwide social and environmental disruption. The Asia and Pacific region is more vulnerable to climate change risks than other regions due to its dependence on the natural resources and agriculture sectors. Densely populated coastal areas, weak institutions, and the poverty of a considerable proportion of its population add to the susceptibility of this region. Adaptation—making adjustments in natural or human systems in response to actual or expected climate stimuli— becomes a key strategy for sustaining economic growth. This volume examines the framework conditions for integrating

climate change adaptation measures into agriculture, water, and natural resources management activities for the Asia and Pacific region. Based on the review of country experiences, the book describes key dimensions, suggests interventions for further exploration, and serves as a basis for planning and mainstreaming climate change adaptation into sectoral planning

Loss and Damage from Climate Change - Reinhard Mechler 2018-11-28

This book provides an authoritative insight on the Loss and Damage discourse by highlighting state-of-the-art research and policy linked to this discourse and articulating its multiple concepts, principles and methods.

Written by leading researchers and practitioners, it identifies practical and evidence-based policy options to inform the discourse and climate negotiations. With climate-related risks on the rise and impacts being felt around the globe has come the recognition that climate mitigation and adaptation may not be enough to manage the effects from anthropogenic climate change. This recognition led to the creation of the Warsaw International Mechanism on Loss and Damage in 2013, a climate policy mechanism dedicated to dealing with climate-related effects in highly vulnerable countries that face severe constraints and limits to adaptation. Endorsed in 2015 by the Paris Agreement and effectively considered a third pillar of international climate policy, debate and research on Loss and Damage continues to gain enormous traction. Yet, concepts, methods and tools as well as directions for policy and implementation have remained contested and vague. Suitable for researchers, policy-advisors, practitioners and the interested public, the book furthermore: • discusses the political, legal, economic and institutional dimensions of the issue • highlights normative questions central to the discourse • provides a focus on climate risks and climate risk management. • presents salient case studies from around the world.

Rebalance to Asia III - United States. Congress. Senate. Committee on Foreign Relations. Subcommittee on East Asian and Pacific Affairs 2014

Budget Support in Fragile Situations - Catherrine Dom

Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR) - Adrian Fozzard

This Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR) seeks to provide practitioners with the tools and information needed to respond to the public expenditure policy and management challenges arising from climate change. It is a series of notes and supporting materials written as a first step towards consolidating current research and international experience, identifying emerging practice and providing practical and applicable guidance for staff of central finance agencies, development agencies, environmental agencies and other international organizations working on climate change issues. In addition to emphasizing the importance of strengthening national systems throughout, the Sourcebook focuses on the specific public expenditure policy and management challenges posed by climate change, such as decision-making in the face of uncertain future climate conditions, expenditure planning for extreme weather and climate events, the lack of agreed budget definition and classification of climate change activities.

Stakeholder Engagement in Preparing Investment Plans for the Climate Investment Funds - Asian Development Bank 2013-07-01

Since the inception of the Climate Investment Funds (CIF), the Asian Development Bank (ADB) has participated in the preparation of 15 investment plans covering the two main CIF funds, the Clean Technology

Fund (CTF) and the Strategic Climate Fund (SCF). The SCF comprises three separate programs—the Pilot Program for Climate Resilience (PPCR), the Scaling Up Renewable Energy Program (SREP), and the Forest Investment Program (FIP). This study, which is part of a wider review of CIF experiences in ADB, uses a case study approach to examine how stakeholder engagement was carried out in the preparation of investment plans in Cambodia, Nepal, and the Philippines, with reference to the guidance provided by ADB and CIF in stakeholder participation.

The Asian Century, Sustainable Growth and Climate Change - Moazzem Hossain 2013-01-01

This path-breaking book investigates the challenges of realizing the Asian century. Prosperity in Asia does not only mean economic growth; the issues of public health, sanitation, income equality, the social safety net and efficient use of natural resources are also important. It argues for new policy initiatives in social, environmental and natural resource areas of South, Southeast and East Asia. This insightful volume is presented in three parts: Part I identifies the major socio-economic factors which are likely to take away the opportunities in realizing the Asian century by 2050; Part II presents the responsible policy issues which would be needed to overcome the hurdles such as public finance, natural resources, public health and sanitation, intra-Asia migration and decentralized governance; and Part III articulates major challenges in realizing Asian prosperity including sustainable international business and sustainable growth. The topics examined range from demographic conditions and tax reform to responsible use of natural resources in the years to come. The Asian Century, Sustainable Growth and Climate Change will appeal to academics in the fields of Asian studies and environment ecology. The major challenges in the future for South Asian growth due to the impact of climate change will prove invaluable for practitioners and policy-makers.

1400+ MCQs with Explanatory Notes For GENERAL KNOWLEDGE - Disha Experts 2018-03-31

The book '1400+ MCQs with Explanatory Notes For GENERAL KNOWLEDGE' has been divided into 18 chapters which have been further divided into 44 Topics containing 1400+ “Multiple Choice Questions” for Quick Revision and Practice. The Unique Selling Proposition of the book is the explanation to each and every question which provides additional info to the students on the subject of the questions and correct reasoning wherever required. The questions have been selected on the basis of the various types of questions being asked in the various exams.

Tackling Climate Change Through Livestock - Food and Agriculture Organization of the United Nations 2013
Greenhouse gas emissions by the livestock sector could be cut by as much as 30 percent through the wider use of existing best practices and technologies. FAO conducted a detailed analysis of GHG emissions at multiple stages of various livestock supply chains, including the production and transport of animal feed, on-farm energy use, emissions from animal digestion and manure decay, as well as the post-slaughter transport, refrigeration and packaging of animal products. This report represents the most comprehensive estimate made to-date of livestock contribution to global warming as well as the sectors potential to help tackle the problem. This publication is aimed at professionals in food and agriculture as well as policy makers.

The Atlas of Climate Change - Kirstin Dow 2016-05-04

This highly acclaimed atlas distills the vast science of climate change, providing a reliable and insightful guide to this rapidly growing field. Since the 2006 publication of the first edition, climate change has climbed even higher up the global agenda. This new edition reflects the latest developments in research and the impact of climate change, and in current efforts to mitigate and adapt to changes in the world's weather. The atlas covers

a wide range of topics, including warning signs, vulnerable populations, health impacts, renewable energy, emissions reduction, personal and public action. The third edition includes new or additional coverage of a number of topics, including agreements reached in Copenhagen and Cancun, ocean warming and increased acidity, the economic impact of climate change, and advantages gained by communities and business from adapting to climate change. The extensive maps and graphics have been updated with new data, making this edition once again an essential resource for everyone concerned with this pressing subject.

Climate Change and Growth in Asia - Moazzem Hossain 2011-01-01

Climate Change and Growth in Asia is a comprehensive analysis of the major issues of climate change and global warming and their possible impacts on the growth of major Asian economies. The book addresses the climate change crisis in Asia within the context of three major challenges of growth: population, poverty and greenhouse gas emissions.

Mainstreaming Climate Risk Management in Development - Asian Development Bank 2017-11-01

The Pilot Program for Climate Resilience (PPCR) is a funding window of the Climate Investment Funds, of which the Asian Development Bank (ADB) is a major partner in Asia and the Pacific, delivering investments through six country programs (Bangladesh, Cambodia, Nepal, Papua New Guinea, Tajikistan, and Tonga) and one regional program for the Pacific. This study looks back at the development of PPCR funding from an ADB perspective, documents the contributions of the PPCR to country readiness for adaptation planning and climate finance, and identifies some early lessons learned from Cambodia, Nepal, and Tajikistan.

As Climate Changes - Kenneth M. Strzepek 1995-12-07

The studies focus on the impacts of climate change in the developing countries around the world.

Addressing Climate Change and Migration in Asia and the Pacific - Asian Development Bank 2012-03-01

Climate change will increase the frequency of extreme weather events, making more geographic places inhospitable to human habitation and secure livelihoods. This report presents a detailed picture of the potential impacts of climate change on migration in Asia and the Pacific. It draws upon a wealth of research to provide policy makers with informed analysis of an emerging phenomenon requiring urgent attention by governments and the international community. The report also suggests that climate-induced migration should be seen not only as a threat to human well-being but also as a potential tool to promote human adaptation to climate change.

Governing Climate Change in Southeast Asia - Jens Marquardt 2021-12-08

This volume showcases the diversity of the politics and practices of climate change governance across Southeast Asia. Through a series of country-level case studies and regional perspectives, the authors in this volume explore the complexities and contested nature of climate governance in what can be considered as one of the most dynamic and multi-faceted regions of the world. They reflect upon the tensions between authoritarian and democratic climate change governance, the multiple roles of civil society and non-state interventions, and the conflicts between state planning and market-driven climate change governance. Shedding light on climate change mitigation and adaptation efforts in Southeast Asia, this book presents the various formal and informal institutions of climate change governance, their relevant actors, procedures, and policies. Empirical findings from a diverse set of environments are merged into a cross-country comparison that allows for elaborating on similar patterns whilst at the same time highlighting the distinct features of climate change governance in Southeast Asia. Drawing on case studies from all Southeast Asian countries, namely Brunei Darussalam,

Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Timor-Leste, and Viet Nam, this book will be of great interest to students, scholars, and practitioners dealing with climate change and environmental governance.

OECD Development Pathways Social Protection System Review of Cambodia - OECD 2017-11-06

In 2017, the Royal Government of Cambodia published a new Social Protection Policy Framework (SPPF), providing an ambitious vision for a social protection system in which a comprehensive set of policies and institutions operate in sync with each other to sustainably reduce poverty and vulnerability.

Urbanisation at Risk in the Pacific and Asia - David Sanderson 2020-05-29

This book presents practical approaches for tackling the threats from climate change and disasters to urban growth in Pacific island countries and Asian nations. With chapters written by leading scholars and practitioners, *Urbanisation at Risk* presents research and case studies from island countries across the Pacific, Cambodia, Nepal and the Philippines. The book explores and presents the theory, policy and practice of how governments, civil society, aid organisations and people themselves prepare for, withstand and recover better from urban disasters including windstorms, floods, earthquakes and fires, and the effects of climate change. This book is written for urban policy makers, researchers, humanitarian aid and development workers, and anyone interested in urbanisation, participatory approaches, disasters, resilience and climate change adaptation.

Financial Crises, Poverty and Environmental Sustainability: Challenges in the Context of the SDGs and Covid-19 Recovery - Andreas Antoniadis 2022-01-03

This volume advances the state-of-the-art in the study of the interplay among financial crises, poverty dynamics and environmental sustainability. It offers timely and unique contributions to the immediate global challenge of sustainable development. Developing a new evidence-base, the volume offers concrete recommendations for policy action needed in advancing the Sustainable Development Goals (SDGs) in relation to environment and poverty during the current conditions of financial distress. The approach taken is inductive and evidence-driven. Most analysis is based on in-depth case studies that aim to offer a detailed and dynamic picture on how poverty and environmental sustainability interact in specific social contexts and financial crises. In this way the volume aims to generate a wealth of new and concrete evidence that offer a solid foundation to understand the multiple channels through which social and environmental factors interact, and the ways in which this interaction can and should be managed in order to achieve the needed global transition to sustainability. Broader dynamics that are covered and analysed include the historical legacies of structural adjustment and colonialism; the current debt wave experienced in developing countries; the role of inequality; the significant impact that climate change has on livelihoods and on meeting the SDGs; the new challenge presented by the Covid-19 pandemic for the SDGs; the challenge of sustainable funding for SDGs; and the need for a new eco-social contract. Case-studies examined include Cambodia, Ethiopia, India, Indonesia, Zambia, and subregions such as the Caribbean, sub-Saharan Africa and Lower Mekong Countries. The volume is part of a joint initiative by the 'Sussex Sustainability Research Programme (SSRP)' of the University of Sussex, the 'UNDP-UNEP Poverty-Environment Action for Sustainable Development Goals' and the 'United Nations Research Institute for Social Development (UNRISD)'. The overall aim is to advance a new research programme and foster a better understanding of the multiple, complex and often opposing ways through which the punctuated economic slowdown of financial crises, poverty dynamics and environmental sustainability interact. It also makes novel recommendations into how poverty reduction and environment can

work in synergy rather than being antagonistic, especially during financial distress, leading into recommendations directly geared towards achieving the SDGs and beyond.

Adapting to Climate Change - Bruce C. Glavovic 2014-04-18

This book identifies lessons learned from natural hazard experiences to help communities plan for and adapt to climate change. Written by leading experts, the case studies examine diverse experiences, from severe storms to sea-level related hazards, droughts, heat waves, wildfires, floods, earthquakes and tsunamis, in North America, Europe, Australasia, Asia, Africa and Small Island Developing States. The lessons are grouped according to four imperatives: (i) Develop collaborative governance networks; (ii) build adaptive capabilities; (iii) invest in pre-event planning; and (iv) the moral imperative to undertake adaptive actions that advance resilience and sustainability. "A theoretically rich and empirically grounded analysis of the interface between disaster risk management and climate change adaptation, comprehensive yet accessible, and very timely."

Mark Pelling, Department of Geography, King's College London, UK. "This book represents a major contribution to the understanding of natural hazards planning as an urgent first step for reducing disaster risk and adapting to climate change to ensure sustainable and equitable development." Sálvano Briceño, Vice-Chair, Science Committee, Integrated Research on Disaster Risk IRDR, an ICSU/ISSC/ISDR programme. Former Director International Strategy for Disaster Reduction, UNISDR. "What a welcome addition to the young literature on climate adaptation and hazard mitigation! Bruce Glavovic and Gavin Smith each bring to the editing task a rare blend of solid scholarly attainment and on-the-ground experience that shines through in this extensively-documented synthesis of theoretical ideas from the realms of climate and hazards and their validation in a rich set of diverse case studies pulled in from around the world. This book should remain a classic for many years." William H. Hooke, American Meteorological Society.

The United Nations World Water Development Report 2020 - UNESCO 2020-03-27

The 2020 edition of the WWDR, titled *Water and Climate Change* illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses – in terms of adaptation, mitigation and improved resilience – that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.

Aid Effectiveness for Environmental Sustainability - Yongfu Huang 2017-12-28

This collection examines the role that foreign aid can play in dealing with the severe global challenge of climate change, one of the most pressing international development issues of the 21st century. Addressing the key threats of rising temperatures, changes in precipitation, coastal erosion and natural disasters, the book considers the implications for policy and future research, particularly in developing countries. Focusing on the

worth of foreign aid in ensuring environmental sustainability, this collection consider how it can be used to improve access to sustainable energy, to promote efficient use of energy resources, to improve emission reduction and support the preservation of biodiversity in forests. Advancing our knowledge about foreign aid and climate change, it provides policy recommendations for the donors and recipient country governments. A cutting edge text on one of the most pressing international development issues of this century, this is key reading for all scholars of international development and climate change.

OECD Green Growth Studies Towards Green Growth in Southeast Asia - OECD 2014-11-11

Carried out in consultation with officials and researchers from across the region, Towards Green Growth in Southeast Asia provides a framework for regional leaders to design their own solutions to move their countries towards green growth.

Status of Climate Change Adaptation in Asia and the Pacific - Mozaharul Alam 2018-10-31

This volume provides an overview of the climate change adaptation objectives set, actions taken, and challenges faced by several countries in the Asia-Pacific region. The majority of the populations in this region struggle to make a living from subsistence agriculture, and livelihoods are highly dependent on natural ecosystem services which are likely to be severely affected by climate change. Cases discussed in this book highlight successes made by governments towards achieving adaptation objectives, and efforts required to overcome challenges. While significant economic advances have been made, the pace of growth has been slow to impact the lives of a majority of the people who live below the poverty line. The chapters highlight adaptation actions for protecting people and their livelihoods in priority sectors, maintaining food and water security, supporting socio-economic stability including poverty reduction, and climate risk management. This book also maximizes readers' insights into the knowledge gaps and limitations of stated adaptation goals, and the bottlenecks that hinder implementation in different regions.

Extracting Development - Oliver Tappe 2022-10-10

Resource extraction is currently shaping Southeast Asian landscapes and people's lives to an unprecedented degree. This volume explores old and new resource frontiers, their effect on local economies and social relations, and questions of (contested) resource control and governance. Case studies from Laos, Thailand, Myanmar, and Cambodia, illustrate the predicament of globalized extractivism processes in the region, particularly (but not only) with regard to China's rising geopolitical and -economic influence, most prominently expressed by the Belt and Road Initiative. Discussing transboundary investments in land and water reserves, and localized commodification processes of agrarian resources, this volume not only investigates the competing actors and discourses of resource extraction in Southeast Asia. What is more, the different case studies shed light on the contingent outcomes on the ground of transregional economic dynamics and related socio-ecological transformations. Combining macro perspectives with fine-grained micro-scale studies, this volume offers a multi-faceted picture of extractivism in contemporary Southeast Asia.
