

Module 10

Synthesis, conclusions and way forward

Training workshops on
mainstreaming climate change

Recap of the framework and tools

Finding the entry points and making the case

Preliminary assessments

Understanding CC–development linkages

Mod1

Understanding the science

Mod3

Understanding climate-related uncertainties

Mod4

Raising awareness and building partnerships

National consensus and commitment to climate-resilient, low-emission development

Mod5

Strengthening institutions and capacities

Needs assessment
Working mechanisms

Mod2

Mainstreaming CC into policy and planning processes

Collecting country-specific evidence and influencing policy processes

Mainstreaming CC in (sub)national and sector policies, strategies, programmes

Mod6

Costing, assessing and selecting adaptation and mitigation options and measures

Mod7

Strengthening institutions and capacities

Learning by doing

Mod2

Meeting the implementation challenge

Budgeting and financing

Mainstreaming CC in the budgetary process

Mod8

Mainstreaming CC in monitoring systems

Performance assessment frameworks

Mod9

Supporting policy measures

National, sector and sub-national levels

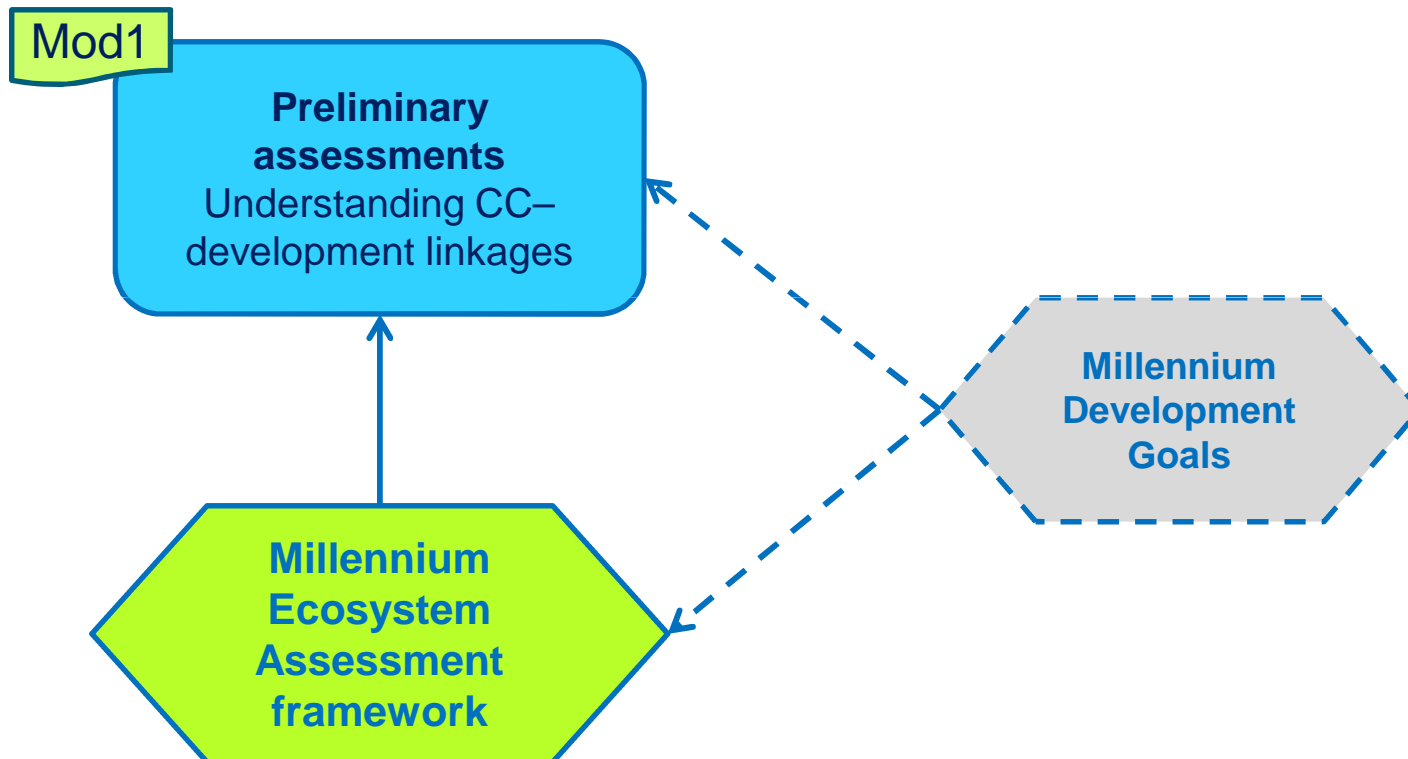

Strengthening institutions and capacities

Mainstreaming as standard practice

Mod2

Engaging stakeholders and coordinating within the development community

Understanding CC–development linkages

Strengthening institutions and capacities

Mod2

Strengthening institutions / capacities
Needs assessment
Working mechanisms
Learning by doing

Mainstreaming as standard practice

National capacity self-assessments

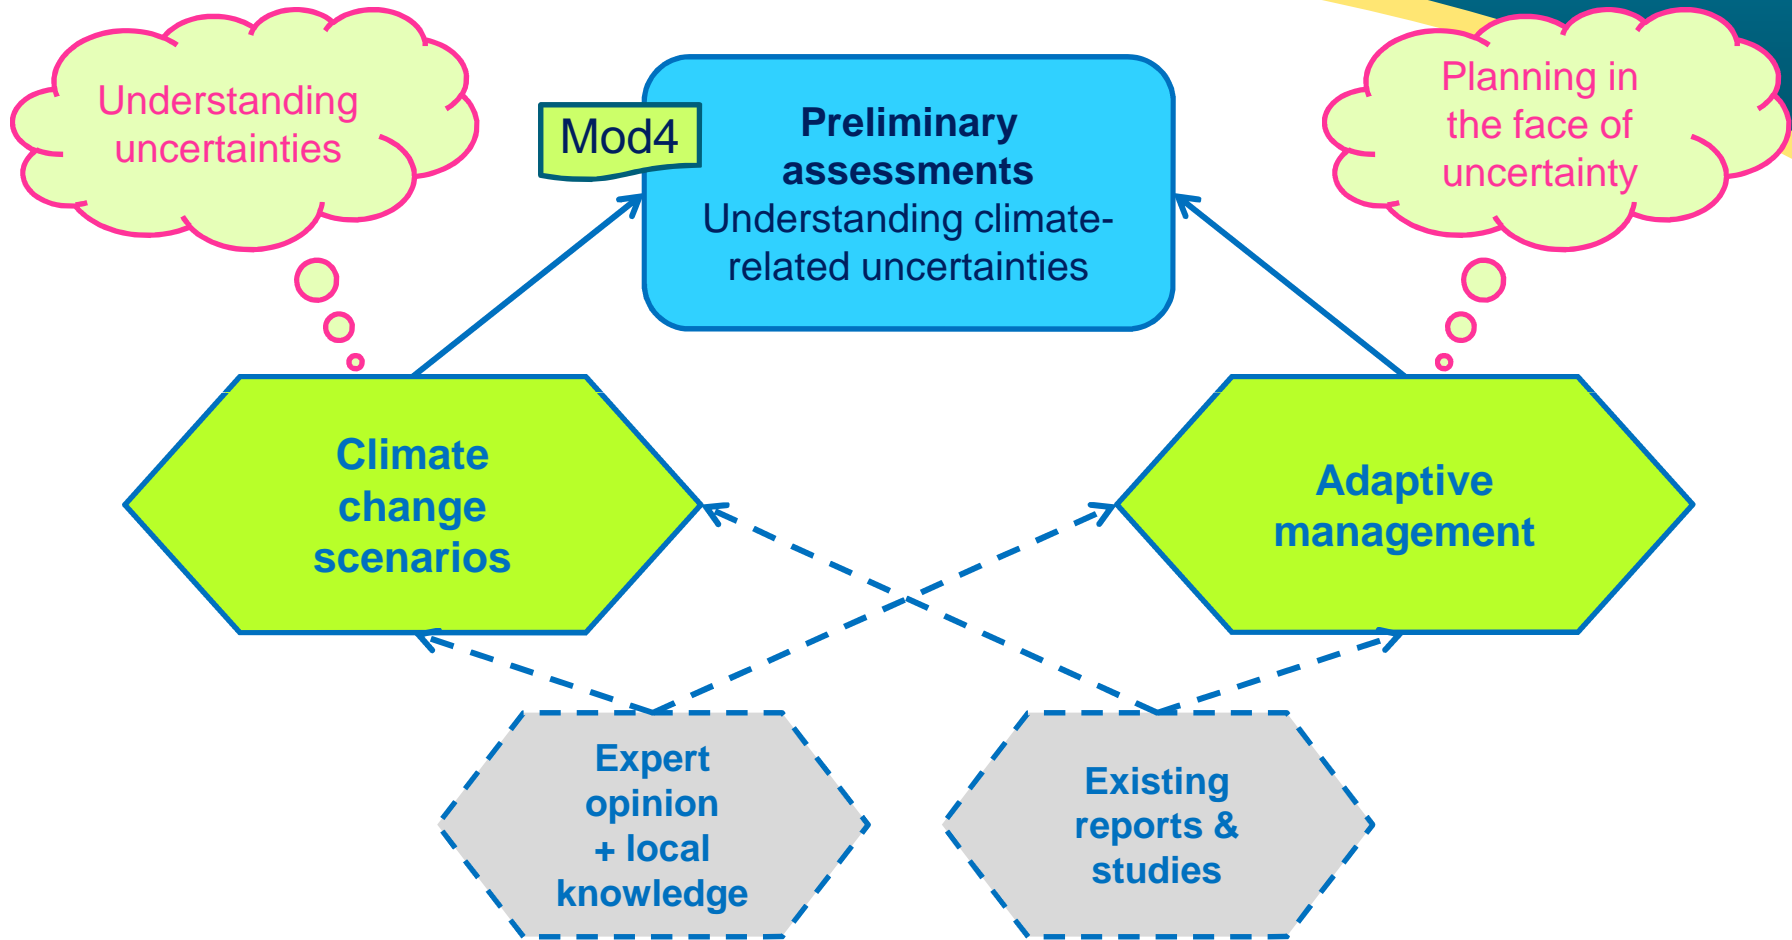

Actions supporting learning-by-doing

Inst'l & management arrangements for mainstreaming

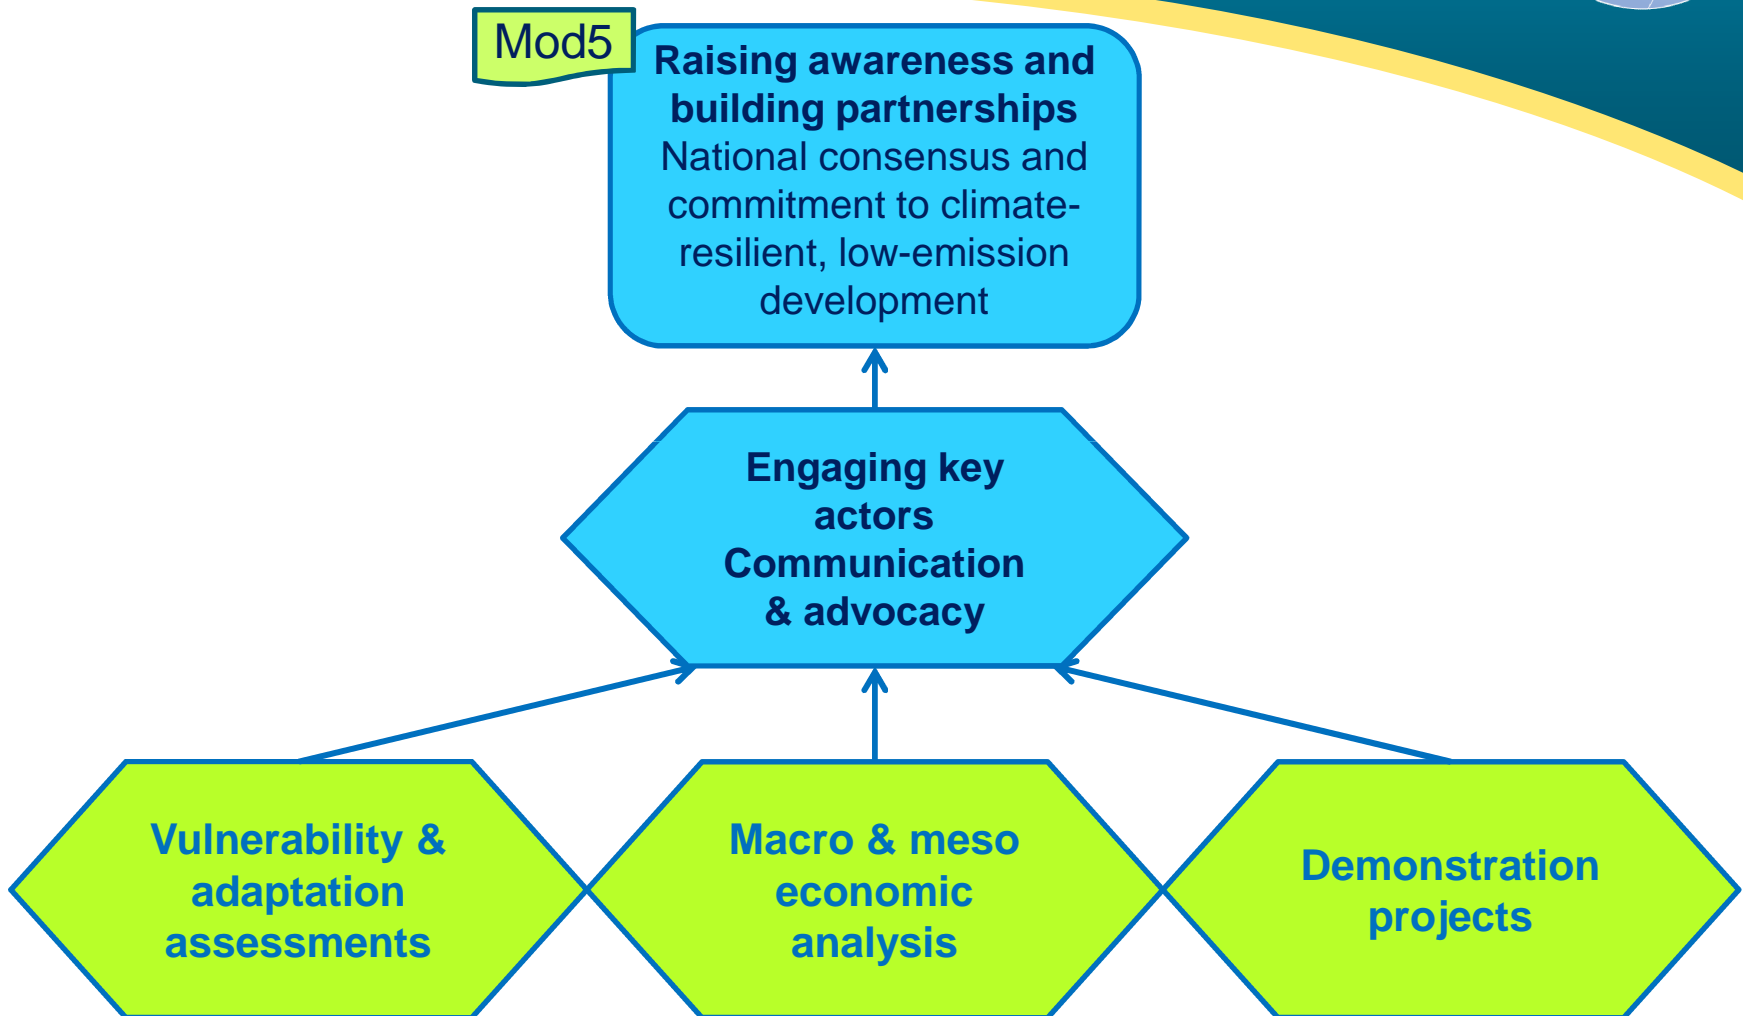

Stakeholder analysis

- Formal training
- Exchange visits
 - On-the-job learning (interdisciplinary teams, twinning, technical assistance, demonstration projects)
- Lesson learning & dissemination

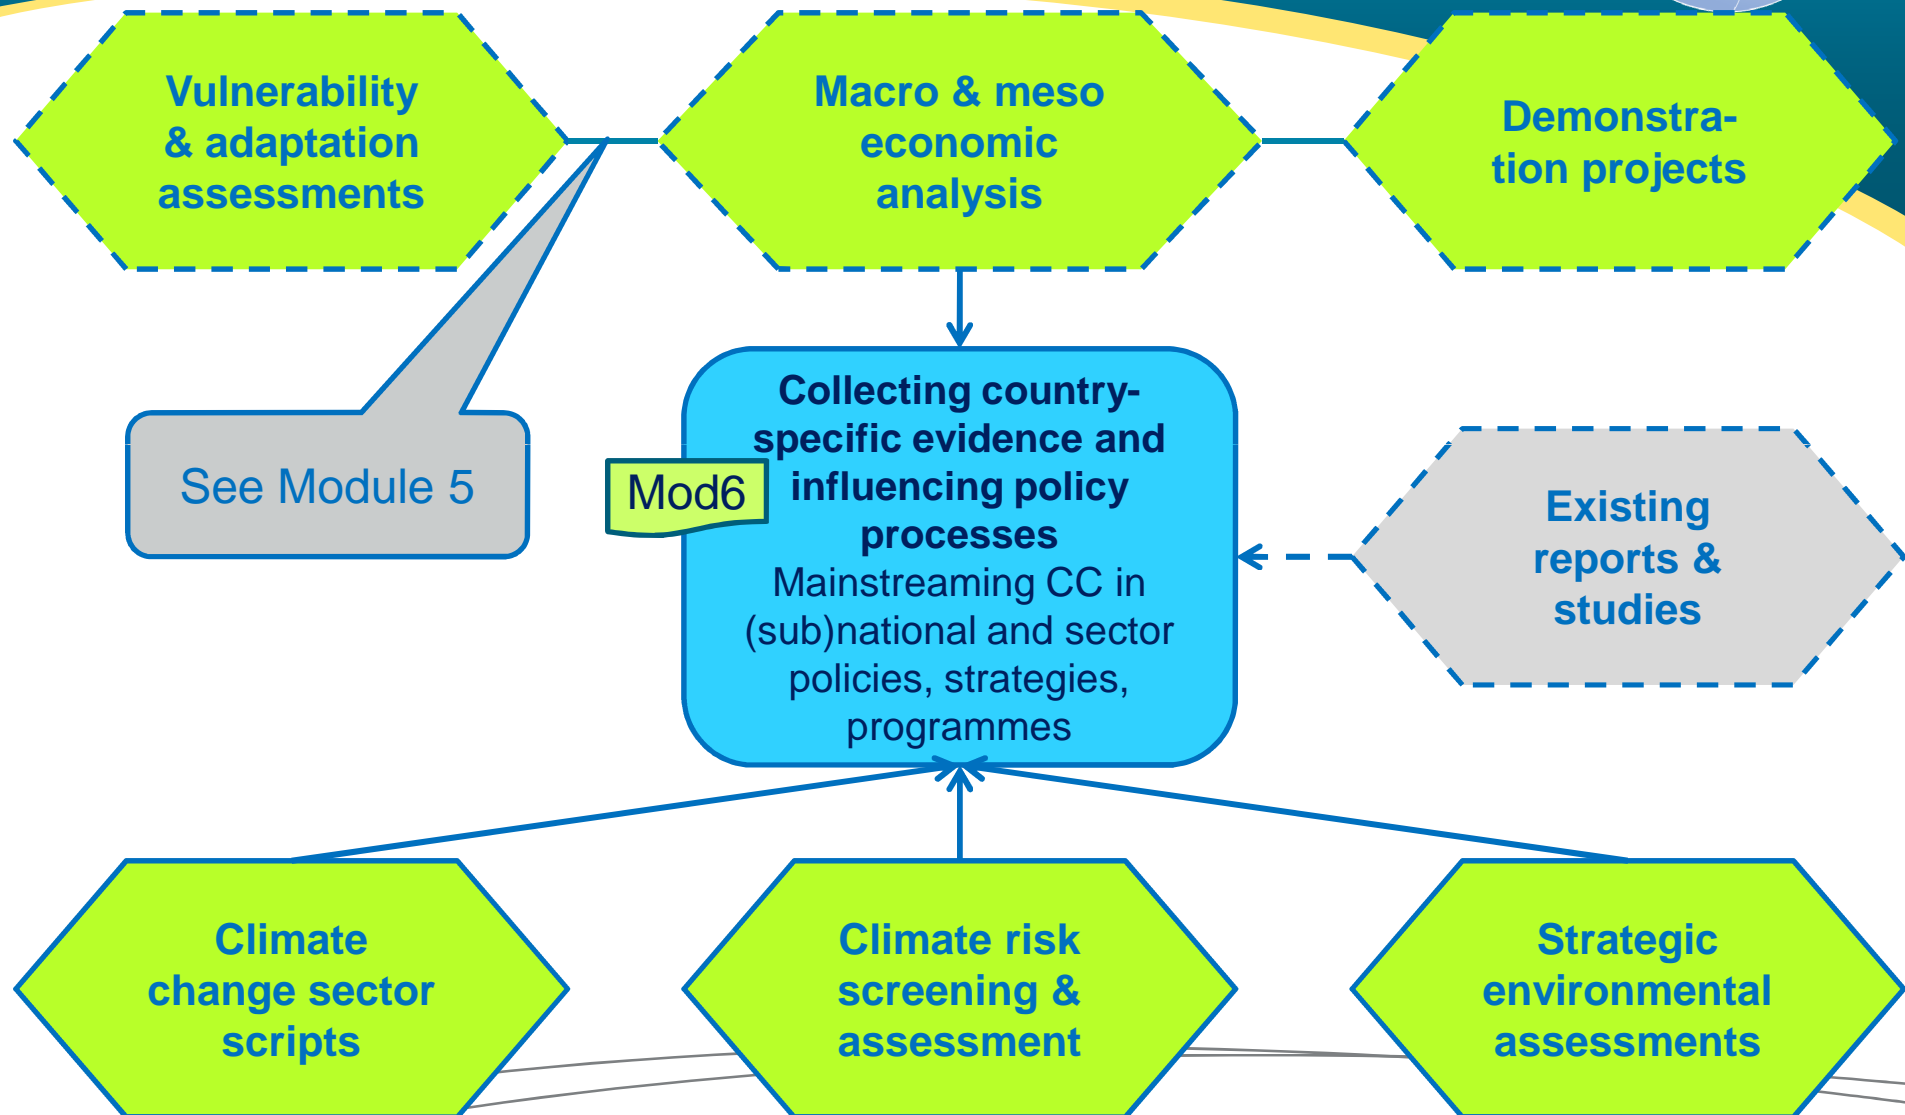

Understanding uncertainties and planning in the face of uncertainty

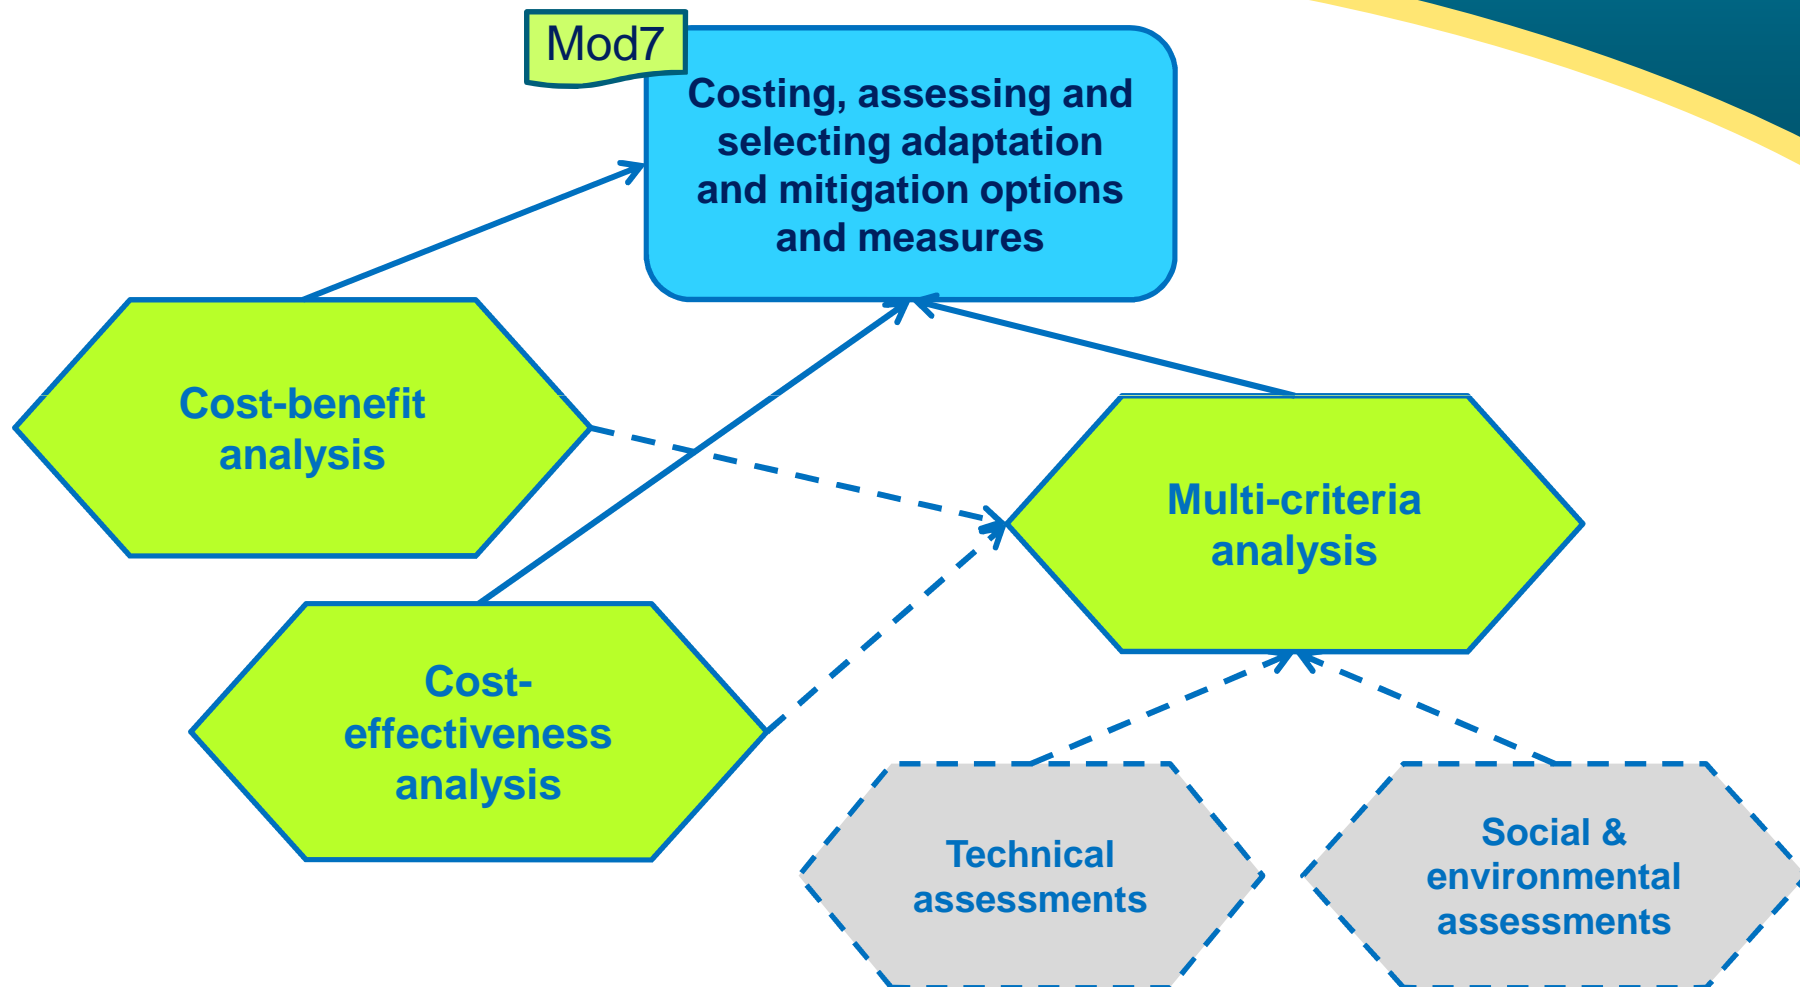

Raising awareness and building partnerships

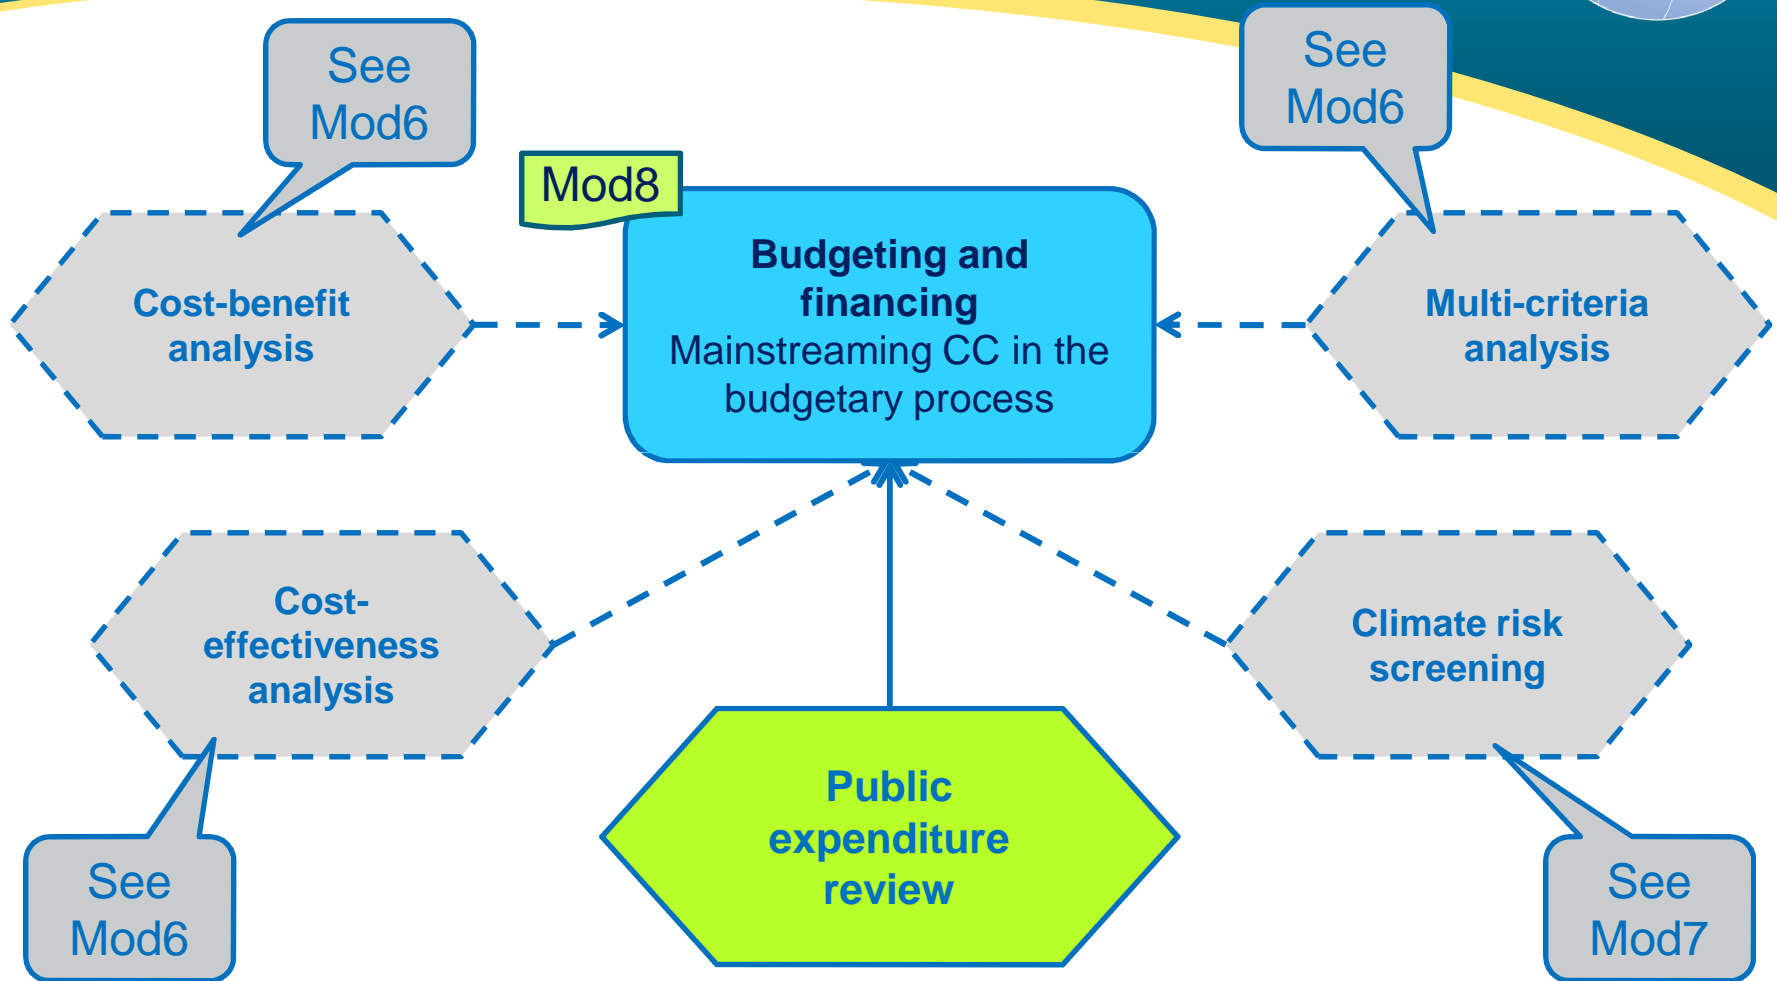

Collecting evidence and influencing policy processes

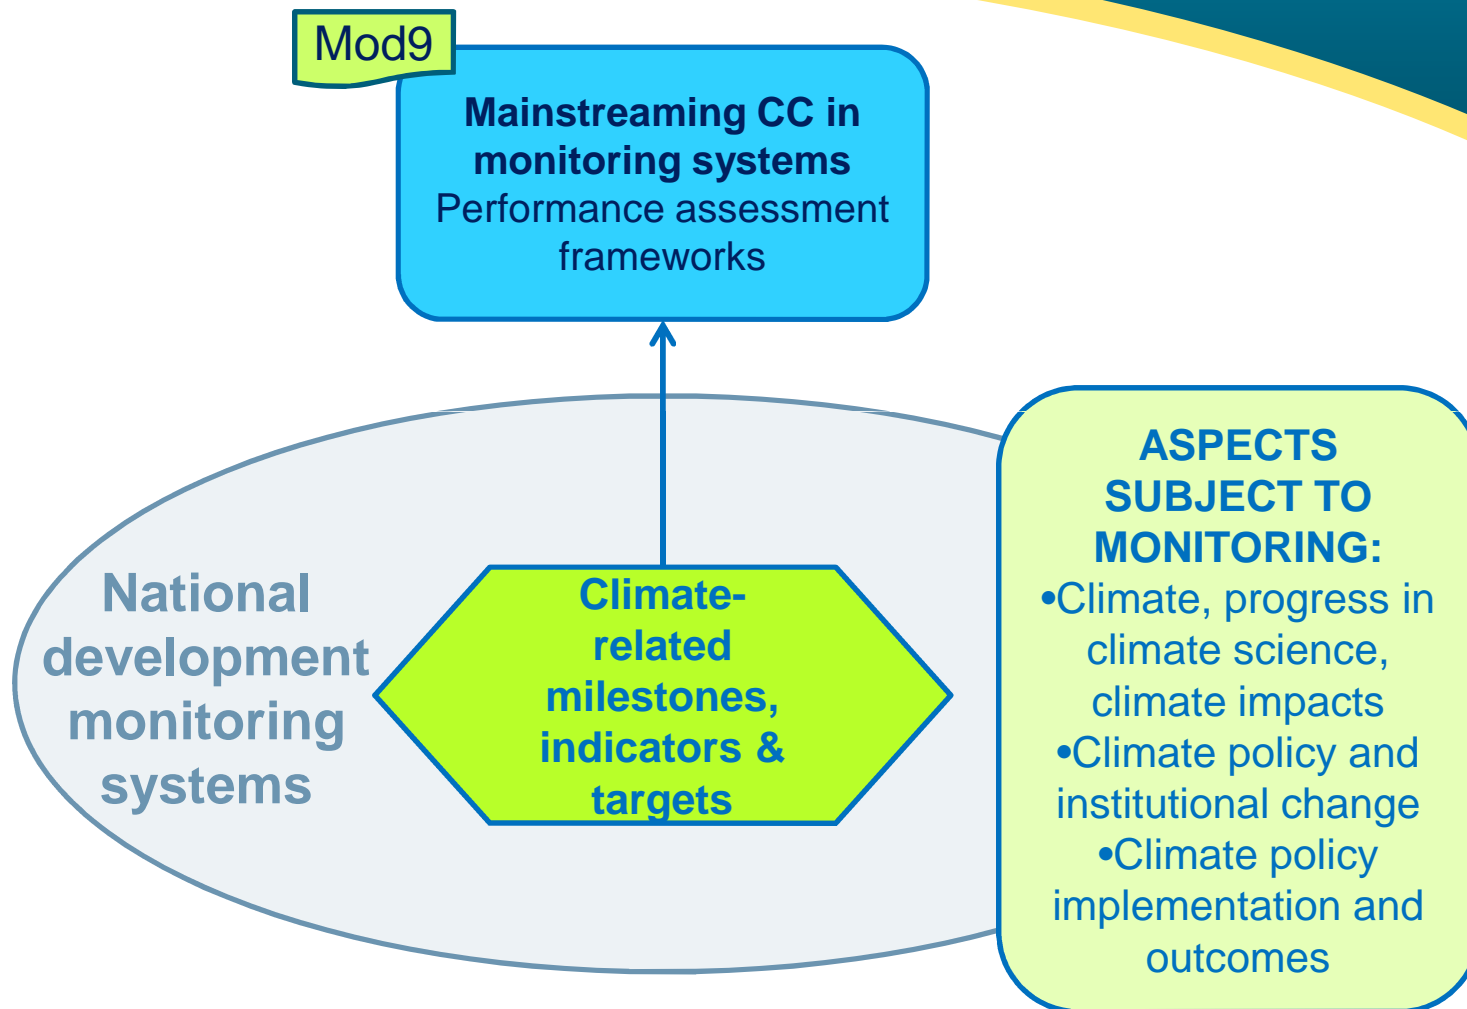

Costing, assessing and selecting options and measures

Mainstreaming CC in the budgetary process

Mainstreaming CC in monitoring systems

Conclusions

Planned actions/Way forward

Seminar evaluation
